

Detailed Description of Cassava Project Diagram

The diagram outlines four key focus areas in a cassava production project:

Area 1: Overcoming emergent diseases threatening cassava production, illustrated with an image of diseased cassava roots.

Area 2: Adding value through processing and business development. It highlights:

- Farmers receiving training and new cassava varieties.
- Processors gaining training, quality monitoring, and new technologies.
- End users engaging in advocacy, market identification, and business support.

Area 3: Managing waste within the value chain for economic returns:

- Oyster mushrooms grown from cassava stems.
- Micro-crystalline cellulose (fibre) from cassava peels.
- Extruded snacks from cassava beer waste.

Area 4: Strengthening the capacity of scientists and practitioners in developing countries.

The diagram uses arrows to show the flow of activities and collaboration between these areas.
